

RI TRANSPARENCY REPORT

2018

Common Interests

About this report

This report is an export of the individual Signatory organisation responses to the PRI Service Provider Reporting Framework during the 2018 reporting period. It shows your responses to mandatory indicators, as well as responses to voluntary indicators that your organisation has agreed to make public. You will be able to access the public RI Transparency report of your organisation and that of other signatories on the PRI website.

The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is an **Index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Index

The Index summarises the response status for the individual indicators and modules. It can be used by stakeholders as an 'at a glance' summary of reported information and to identify particular themes or areas of interest.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
Ø	The signatory has completed some parts of this indicator
8	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator.
Ъ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Responsible investment policy

SG 01 Mandatory Public Gateway,

SG 01.1

Describe how your organisation's philosophy incorporates environmental, social and governance factors, and the link to your business offerings.

As Fiduciaries, we look to the future and the future of our clients and their beneficiaries. We think about their goals, both short term and long term. Future generations depend on the decisions we make today, both from a financial standpoint, and looking at the world and the legacy we leave behind. We believe in knowing what we own, and mindfully designing the impact of our portfolios by looking 'under the hood' of our investments, at the way the companies we own are run, and directing our investments in an attempt to meet our financial goals while also creating change in the world.

The Principles for Responsible Investment Mission calls on signatories to play a role in creating a sustainable global financial system which will "reward long-term, responsible investment and benefit the environment and society as a whole." The preamble to the six Principles recognises that applying the Principles in investment decisions not only supports long-term value creation but may also better align investors with the broader objectives of society - in other words, the SDGs.

To support this mission, we start our investment process with The Sustainable Development Goals, which we believe represent the Crises facing the world over the next 30 years. As investors, we see Crisis and Opportunity as two sides of the same coin, so we use the SDGs to guide our investment process when we're deciding which companies or investment managers to include in our portfolios.

Many investors believe that investments in companies will only be profitable over the long term if the global financial system and societies grow in a sustainable and equitable way. And while responsible investment has typically focused on how ESG factors affect the risk-return profile of investment portfolios, it has tended to overlook how it supports the broader objectives of society.

As such, we subscribe to the SDG agenda which requires signatories to move from a mere process-based approach of material ESG integration towards an outcomes-based approach that, while aiming to achieve market-rate return on investment, explicitly aims to contribute to the sustainability challenges put forward by the SDGs.

SG 04.2

Briefly describe how you incorporate ESG factors and RI-consideration when advising clients on policies.

- Links between SDGs, ESG screens, RI and why we follow the policies that we do:Materiality + Business' sustainability
- Assessing Risk + client goals

•

SG 05 Mandatory	Public	Descriptive
-----------------	--------	-------------

SG 05.1

Briefly describe how you include ESG/RI factors as part of your business offerings.

Business area

Advisory and Consultancy

How you include ESG/RI factors

We offer sustainability scoring of clients and prospective clients' current holdings for a flat fee. we have the capability to evaluate the ESG scores of either individual companies or fund families (active and passive). we can show clients where potential ESG issues may be in their portfolios, and if they are considering investing in a specific company, we can report on the sustainability of that company and identify key material risks to that company's business, when compared against their peer group.

Other, specify (1)

Wealth Management

How you include ESG/RI factors

We primarily offer ESG/RI portfolios. In order to be considered for inclusion in our portfolios, investments must demonstrate a commitment to the space. Our due diligence process includes calls with portfolio managers to verify that their process meets our strict requirements, and we make sure to "lift the hood" on every product we consider. For passive investments like ETFs, we look at index construction and the exclusionary screening processes used, and for actively managed products, we require active ownership policies in addition to ESG screening. Further, we require that ESG be a primary factor in the investment process, rather than an afterthought, and finally, we review the holdings of any investment to see if the managers' process results in holdings that are problematic to our investors.

SG 05.2

Indicate the roles in your organisation, and indicate for each whether they have oversight and/or implementation responsibilities for ESG/RI.

Describe the main components of your training/educational services on ESG/RI and any variations depending on the group you provide training/education to.

- Financial Advisors and Investment Managers- ESG and SRI Basics, engaging with clients on ESG and SRI, the history of ESG/SRI, and how to evaluate potential investments on an ESG/SRI basis.
- CPAs- ESG and SRI Basics + High Level Instruction, SASB Overview, Materiality (provided for CE once accepted by the CPA Board)
- Business Students- ESG and SRI Basics

Emerging Workforce: financial professionals

SG 07.3

Describe whether these training/educational services include any commercial elements.

CPA CE classes may be provided for a fee.

SG 08	Mandatory	Public	Descriptive
-------	-----------	--------	-------------

SG 08.1

Describe how your organisation applies, advances and promotes the PRI Principles.

We apply the principles through our investment choices and recommendations to our clients. We have made RI, the PRI and the SDGs a centerpiece of our website and marketing materials.

We seek to advance the mission of the PRI and the Principles through presentations to the general public and the financial industry. We have partnered with other signatories (including founding signatories) to do webinars and broaden the reach and engagement of our message.

We promote the principles through our advocacy work. In our first year, we've signed on to two shareholder letters, one promoting the acceptance and standardization of ESG Data at the Securities Exchange level, and one promoting sustainable agriculture in the production of Palm Oil. We highlight these efforts through our social media and website.

SG 08.2

Highlight whether there are any ways that your organisation would like to engage further with the PRI. [OPTIONAL]

Common Interests was founded with the principle of service at the core of our firm's identity. We would love to be more engaged with the PRI in any way possible, and welcome the opportunity to serve.

SG 09 **Mandatory Public** Indicate which of the following actions your organisation has taken to promote SG 9.1 responsible investments during the reporting year, independently of collaborative initiatives. ☐ Provided or supported education or training programmes for clients, investment managers, legal advisers or other investment organisations \square Provided financial support for academic or industry research on responsible investment ☑ Encouraged better transparency and disclosure of responsible investment practices across the investment industry ☑ Spoken publicly at events and conferences to promote responsible investment ☐ Written and published in-house research papers on responsible investment ☑ Encouraged the adoption of the PRI ☐ Written and published articles on responsible investment in the media ☐ Policy engagements and other interactions ☐ Other, specify **SG 10 Public Mandatory Descriptive** Indicate which of the following long-term trends are addressed in your product outputs. SG 10.1

Changing demographics

SG 10.2 Explain how this long-term trend affects your product outputs.

Within our practice, we are offering multigenerational financial planning meetings to help ease the intergenerational transfer of wealth and begin bringing the beneficiaries of our accounts into the investment process so we can get an idea of what values they want to see expressed in their portfolios. Within our investments, we are looking at long term healthcare issues and other investments that we believe will be needed more as the population ages.

☑ Climate change

SG 10.2 Explain how this long-term trend affects your product outputs.

We are concerned about the risks to our portfolios from a number of climate related factors. from stranded asset risk to energy companies to floods and droughts, to increased chances of severe weather to the economies of every country. We demand that the managers we work with take these risks into account in their investment process.

☑ Resource scarcity

SG 10.2 Explain how this long-term trend affects your product outputs.

This represents a classic supply/demand mismatch. We have been watching Water especially carefully in light of South Africa's zero day, and have added water investments to our portfolios to try to both solve the problem and capitalize on the need.

☑ Technology developments

	SG 10	2 Explain how this long	g-term trend affects your product outputs.			
	A sleeve of our portfolios is devoted to investing for the "Next Economy" which we believe will be based technologies such as clean energy, energy storage, and other technological innovations.

SG 12 Mandatory Public Descriptive

SG 12.1

Describe how you align your organisation's philosophy on and approach to ESG/RI with investor goals.

Describe

We use our website: www.commoninterestsfinancial.com/sri/ to introduce the overall concept to our clients. For our smaller clients, we determine whether they have specific themes they would like to see in their portfolios, then pick a low-cost, off the shelf, managed model for them to invest in without commissions. for our larger clients, we begin by talking about the screens we use in our core models that are managed in house, and set alternate positions within the models to customize their investments to their values set. for instance, if a client wishes to feature gender lens investing, we will substitute a gender fund for our large-cap holding, where doing so will not change the asset allocation, but will provide the client the exposure and advocacy they seek.

○ This is not relevant for my organisation

SG 12.2 Additional information. [OPTIONAL]

Plan to capture more detailed client impact goals

SG 13 Mandatory Public Descriptive

SG 13.1

Describe what steps you take, if any, when your ESG recommendations are not in line with investor goals.

Describe

We believe that ESG factors provide an additional layer of risk management, and that it is wise and prudent to include them in the investment process. We discuss our views on ESG with each client, but when clients do not wish to include ESG factors in their investment strategy, we are obligated to follow their wishes. For these clients, we individually build portfolios that align with their objectives.

O This is not relevant for my organisation

SG 14	Mandatory	Public	Descriptive
SG 14.1	Indicate whether you seek feedback from offerings	lients on your RI/ESG	services and product
Yes			

SG 14.2 Describe how you use this feedback in your RI/ESG services and product offerings.

Within our models, we have the ability to build custom Impact portfolios within our fixed income sleeve. We seek feedback from our clients as to which impact themes they want to see highlighted in their portfolios as a way of helping them express their values in their investments.

Yes, we systematically do

AC 07.2 Indicate how you incorporate ESG into your strategic asset allocation services. ☑ Incorporating climate change-specific factors into analysis of expected returns and risk levels across asset classes ☑ Incorporating other environmental considerations into analysis of long-term expected returns and risk levels across asset classes e.g. biodiversity, water usage, waste and hazardous materials ☑ Incorporating social considerations into analysis of long-term expected returns and risk levels across asset classes ☑ Incorporating governance considerations into analysis of long-term expected returns and risk levels across asset classes ☑ Incorporating ESG when advising on target percentages for allocation in asset classes ☑ Aligning the strategic asset allocation with the client's ESG investment policy, ESG investment objectives and ESG risk profile ☐ Other, specify(1) ☐ Other, specify(2) ☐ Other, specify(3) O Yes, we occasionally do

AC 09 Mandatory Public

O No, we do not. Plans exist to start incorporating ESG into our strategic asset allocation services in

AC 09.1

Describe how you measure, track or otherwise demonstrate your value on asset allocation activities.

We use multiple performance and asset allocation reporting tools, including Envestnet and Albridge Wealth Reporting. Clients have full access to these tools, and can compare their portfolios to their benchmarks to see how our decisions have impacted their returns, which includes the ability for our clients to run custom reports over any time period they want to see.

AC 14 Mandatory Public Descriptive

AC 14.1

Describe how you incorporate asset owners' investment principles into the manager selection process.

We have access to managers that focus on different themes. when a client comes to us with a specific request that we are not able to fulfil in house, we are able to do the due diligence on managers that specialize in the values our clients bring us, and, if necessary, work to get managers approved on our platform if none exist already.

AC 15 Mandatory Public Descriptive

AC 15.1

Briefly describe how you include ESG factors in your due diligence process for manager selection.

At the bare minimum, we always have a call with the portfolio manager to ascertain how they are using ESG factors. if the PM states that they do not use ESG factors, they are not considered for investment. if they consider ESG factors, but only in a de minimus fashion, they may be considered for clients who express an interest in holding a fund with holdings that are at odds with the client's ethical values, but on a case by case basis, not as a core position.

AC 16.2

Describe how you raise and manage concerns when monitoring investment managers on ESG factors.

We have ongoing calls with the portfolio managers where we bring a list of potential concerns. Premeeting due diligence is conducted including a review of the portfolio's current holdings.

AC 17 Mandatory Public Descriptive

AC 17.1

Indicate whether you report back to asset owners on your manager selection and/or monitoring activities.

Yes, we systematically do

AC 17.2

If yes, describe how you report back and the frequency.

we meet with clients at a minimum annually and report and field questions from clients. manager selection and monitoring is a key part of this process.

- O Yes, we occasionally do
- O No, we do not

AC 18 Mandatory Public Descriptive

AC 18.1

Describe how you measure, track or otherwise demonstrate your value on manager selection, appointment, and monitoring services.

We present research to clients about the managers we select and highlight their advocacy work and impact criteria in ongoing communications.
