Methodology

Comparison calculation methodology

This report compares two selected portfolios: **ESG Conservative** and **Conservative Benchmark**. Both portfolios were chosen by the advisor. The displayed comparisons represent a dollar-weighted average based on the portfolio constituents with data coverage for each metric. For example, 30% less animal exploitation (-30%) means that, as a dollar-weighted average, 30% fewer constituents in **ESG Conservative** have ties to animal testing and animal food products, compared to the portfolio selected for comparison (**Conservative Benchmark**). Funds are assigned a value for each metric based on a dollar-weighted average of the companies held by that fund with data coverage for that metric.

Impact breakdown relative to peers

This section measures a portfolio's relative performance in 5 major issue areas (Health, Environment, Human Rights, Equal Opportunity, Accountability) according to the following process.

For each displayed metric, the comparison between the two portfolios, (ESG Conservative and Conservative Benchmark), are ranked against the benchmark comparisons for that metric for all funds in our database. These ranks are averaged by issue category. These averages are weighted by a factor representing the coverage of each metric within a portfolio. For portfolios that include funds, managers' shareholder engagement activities are included in the overall category comparisons.

Coverage

This report is based on the portion (57%) of your portfolio, and the portion (56%) of the benchmark selected for comparison, covered by YourStake. YourStake's coverage universe consists of public equities, public equity funds, and corporate bond funds. Fund coverage is calculated as the dollar weighted percentage of the fund held in corporate equities or fixed income instruments covered by YourStake. The metrics displayed in this report are based on the selected ESG issues for this portfolio. If no ESG issues are selected, then the top metrics based on coverage and relevance in this report are displayed by default.

Appendix of Data
